

all machcode programming. It is convenient, simple to use and flexible.

Pal is available from most dealers or direct through Pittwater Distributors.

## Power 64

All BASIC programmers deserve to use the features in this toolkit which has everything from Merge and Renumber to interpret driven key checks. Sound good?

Other features include redefinable function keys, hex conversion, undo (to retrieve new programs), disk commands and much more.

The ultimate utility program, Power is well documented by Jim Butterfield and Brad Templeton, the author of Pal. The real fun begins when utilising the compatibility of Pal and Power programs.

All Power commands may be used when entering source code on Pal - an excellent combination by any standard.

Power is also available from most dealers or direct from Pittwater Distributors.

## 64 Tips

The following pokes are useful for crash-proofing programs and for protecting valuable software from being copied. The normal value of each location will reverse the previous poke.

POKE 775,200	disables list command; normal value is 167
POKE 808,239	disables stop key; normal value is 237
POKE 808,225	disables restore and stop key; normal value is 237
POKE 818,32	disables save command; normal value is 237
POKE 816,32	disables load command; normal

POKE 649,0 value is 237  
disables keyboard;  
normal value is 10

Plenty more next month, including a program to convert programs from text files and text files to programs.

## Sydcorn 64

The Sydney Commodore 64 Users Group has been doubling in size every month and recently announced plans to move location from the now overcrowded classroom above Computer-wave.

At the time of writing, Redfern Technical College looked as though it would be the final choice. People wishing to confirm the venue for the next meeting, on the first Tuesday of February, should contact Paul Bartolo on 607-6228 or myself on 99-2640. □

**NEW DISK CONTROLLER BOARDS**
